

Sprocket drop forged chain

Sprockets for drop forged chain consist of a body with symmetrical hub and interchangeable teeth segments. This has the advantage that, when the sprockets wear out, only the wear-resistant teeth segments need to be replaced. Sprockets can be made to your specifications on request. The following versions are available ex stock.

Sprockets for drop forged chain available ex stock (parameters in mm)

Pitch	Pitch \emptyset / number of segments per complete set				
	6 teeth	7 teeth	8 teeth	9 teeth	10 teeth
102	\emptyset 204,00 / 4	\emptyset 235,09 / 4	\emptyset 265,49 / 4	\emptyset 298,23 / 4	\emptyset 330,08 / 4
125	\emptyset 250,00 / 4	\emptyset 288,10 / 4	\emptyset 326,64 / 4	\emptyset 365,48 / 4	\emptyset 404,51 / 4
142	\emptyset 284,00 / 4	\emptyset 327,28 / 4	\emptyset 371,06 / 8	\emptyset 415,18 / 6	\emptyset 459,52 / 4
150	\emptyset 300,00 / 6	\emptyset 345,71 / 4	\emptyset 391,97 / 8	\emptyset 438,57 / 4	\emptyset 485,42 / 10
160	\emptyset 320,00 / 4	\emptyset 368,76 / 4	\emptyset 418,10 / 8	\emptyset 467,81 / 4	\emptyset 517,77 / 4
200	\emptyset 400,00 / 4	\emptyset 460,95 / 4	\emptyset 522,62 / 8	\emptyset 584,76 / 4	\emptyset 647,21 / 4

Body with interchangeable teeth segments. (8 teeth)
